Microsoft XP Support: Every Ending Leads to a New Beginning

Maybe the sky isn't falling as the scare theorists would have you believe, but the end of support for Windows XP IS coming, and knocking on wood and crossing your fingers just won't cut it for an insurance plan. Maybe you're banking on the goodwill of Microsoft to keep issuing patches, alerts or updates to those who have yet to migrate from XP (that's about 40% of you by the way!), but again, not a practical approach to securing your corporate desktops and IP.

The logo for Kleiner Perkins Caufield Byers (KPCB) is displayed in white text on a dark teal background. The letters 'KPCB' are large and bold, followed by a vertical line and the full name of the firm stacked in smaller, all-caps letters.

Mary Meeker & Liang Wu of KPCB Offer Insights on Mobile Device Growth Outpacing that of PC

The latest edition of the annual Internet Trends report finds continued robust online growth. There are now 2.4 billion Internet users around the world, and the total continues to grow apace. Mobile usage is expanding rapidly... Looking ahead, the report finds early signs of growth for wearable computing devices, like glasses, connected wrist bands and watches – and the emergence of connected cars, drones and other new platforms.
